DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art teaches of a capacitor comprising a plug, a first dielectric stack, a second dielectric stack, and a stud, but the prior art doesn't teach the stud to be at least one third embedded in the first dielectric stack and extend into the second dielectric stack. This combination has been found to be non-obvious, thus allowed. The prior art also does not teach the capacitor having a platinum seed layer formed on the platinum stud and having a barrier disposed between the seed layer and the stud, a tantalum dielectric film disposed over the stud, a platinum cell plate disposed over the dielectric layer, and where the stud is partially embedded in the first dielectric stack. This combination has been found to be non-obvious thus allowed. The prior art also does not teach the capacitor having a seed layer disposed against the stud, a protective film disposed between the first dielectric stack and a portion of the seed film, and where the stud is partially embedded in the first dielectric stack. This combination has been found to be non-obvious thus allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 22-90 are allowed.
